CIGI’s International Law Research Program presents

Systemic Risk in the Financial Sector: Ten Years after the Global Financial Crisis
Thursday May 24, 2018
Fairmont Royal York, Manitoba Room
Toronto, ON

CIGI's International Law Research Program is hosting an invitation only conference in conjunction with Duke University, Radboud University, Hong Kong University and the University of Edinburgh to bring together an interdisciplinary group of some of the world’s leading regulatory experts on financial stability and systemic risk.

The conference will center on the following goals, which will also be the focus of a post-conference book (to which we hope you will consider contributing):

- Review the international and national regulatory responses to systemic risk since the financial crisis;
- Analyse the effectiveness of those responses, both retrospectively (from the perspective of the causes of the financial crisis) and prospectively (from the perspective of potential future triggers of systemic risk);
- Review the systemic risk scholarship since the financial crisis (including the theoretical and empirical literature on (i) macroprudential approaches and systemic risk indicators, (ii) systemic risk governance, risk correlations, and endogenous risk, and (iii) shadow banking and systemic risk);
- Analyse and compare that scholarship, including its proposed responses, to the regulatory responses.

The roundtable discussion will be held under CIGI Discussion Rule:

*When discussions are held under the CIGI Discussion Rule, participants are free to use the information received, but no such participant's individual or institutional views about that information shall be revealed; this Rule shall not prevent the consensus of the participants, as a group, or the identity and affiliation of group members from being revealed.*

About the International Law Research Program

The International Law Research Program (ILRP) at CIGI is an integrated multidisciplinary research and teaching program that provides leading academics, government and private sector legal experts, as well as students from Canada and abroad, with the opportunity to contribute to advancements in international law.

The ILRP strives to be the world’s leading international law research program, with recognized impact on how international law is brought to bear on significant global issues. The program’s mission is to connect knowledge, policy and practice to build the international law framework - the globalized rule of law - to support international governance of the future.

The program focuses on the areas of international law that are most important to global innovation, prosperity and sustainability. It seeks to collaborate with faculty and postgraduate students from universities across Ontario and beyond.
